# The LNE has delivered a food approval certificate for the following products :

## Medium efficiency

**Stainless steel metal filter**  
Ideal Oil mists  
Stop big particles  
Moisture and droplet separator

## Medium efficiency

**Camplis Green Camfil Farr**  
Excellent mechanical resistance  
Waterproof cardboard frame  
Unique conception with round pleating.  
Fully maintained media pasted to the support grid.

## High efficiency – Bag filter

**Hi-Flo / Green**  
Long life cycle  
Low pressure drop  
High efficiency bag filter

## High efficiency – Pleated filter

**Ecopleat Green**  
Available in all sizes  
50 or 98 mm thick  
Ultra compact solution for applications requiring F6 or F7 efficiency.  
Solution to easy evolution from a low efficiency G4 filter  
100% burnable.

## High efficiency – V-Bank Box filters

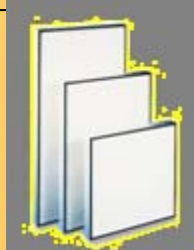

**OPAKFIL Green**  
Corrosion resistant.  
Up to 5000 m<sup>3</sup>/H handled according to the European  
EN 779.2002 standard for 595x595x292.  
F6 to H11 efficiency available  
Easy to handle thanks to the gaskets.  
100% burnable.

## HEPA / ULPA filter

**Sofilair Green**  
The very high efficiency for high air flow for  
perfect security.  
Certified efficiency according to EN 1822  
standard

## HEPA/ULPA filter

**Megalam**  
Clean consistent performance  
throughout the life of the filter through  
the use of CMS™ (CMS– Controlled  
Media Spacing).  
Low pressure drop
